

**LEGEND**

- Outline of external wall below
- Travel restraint system to cladding sub-contractor roof design. Mansafe lanyard system to contractor design to satisfy EN 795 and BS 7883 for roof with two sets of associated harnesses, set 2m from roof edge to entire roof perimeter.
- 10% of Warehouse (non-office) floor areas measured in flat plane to be rooflights. Balance of roof designed to accommodate a full provision of PV panels

Roof access to be through roof hatch but as stated in the access and maintenance statement consideration must be taken for a secondary fire egress. This can be achieved by using a mobile elevation working platform and when using the safety guidelines from H&S.
